QUALIFICATIONS

Broad experience in all major software engineering technology skillsets, including android app development, Python, C#, web development and Arduino servo control in JavaScript. Creative problem solving with a focus on thinking ahead of problems. Familiarity training machine learning models. Diverse team experiences: leading meetings, creating and leading instructive webinars, acting as a scrum lead as well as working as a solo dev. Published author.

EXPERIENCE

Davidson Development, Inc, Seattle, March 2021-now. Working with various Seattle-based companies as a software engineer on a contract / freelance basis. Developing creative solutions from web ad animation, to inventory management software modification.

Software engineer, DNA Seattle, Seattle October 2017 - March 2021. Lead software engineer driving company's full stack development, focusing on advertisement, marketing strategy and helping customers to succeed in the digital world. Worked with 100s of customers, satisfying their rapidly evolving business needs and applying continuous learning throughout the process.

Software engineer, Microsoft, Seattle, Jun 2016 - Nov 2016. Working in the Azure organization, building frontend of the Microsoft systems used by millions of customers to interact with their cloud management solutions. Collaborating across organizations with a diverse set of engineers and product owners, adjusting to rapidly changing requirements.

CEO, GearSpoke, Anchorage, AK , CEO Mar 2011 - Apr 2014. Established a startup focusing on renting outdoors equipment on demand, which was a unique idea at that time. I was leading the company for 3 years, coordinating between engineering, investors and marketing. When I sold it, the startup had 1000s of happy customers.

Buyer, BP Oil Exploration, Anchorage, AK, Mar 2011 - Jun 2013. Worked as mid value buyer (25k-250k) for rotating equipment for BP Exploration Alaska. Volunteered as the emergency response coordinator for the 6th floor at BP headquarters, completing a suite of training classes. Toured warehouses and local manufacturing
spaces and coordinated with various suppliers.

EDUCATION

BA, Business, University of Alaska, Anchorage, 2011
General Assembly Software Developer bootcamp, 2016
